

DaMNet 2019 **The Ninth IEEE ICDM Workshop on Data Mining in Networks**
Nov. 8-11, 2019, Beijing, China (<http://damnet.reading.ac.uk>)
A Workshop of the IEEE International Conference on Data Mining (ICDM)

Workshop Overview

The complexity of numerous social, biological, and communication systems, is driving many researchers towards the adoption of data mining approaches. The characterization, management and control of complex networks are challenging tasks, common to many areas of Science. The Workshop on Data Mining in Networks intends to facilitate the exchange of ideas between different research communities which share a common interest in extracting models and information from complex networks. The workshop focus will encompass data mining algorithms and applications for complex networks, such as communication networks, Internet of Things, social networks, biological networks, citation networks, etc. The workshop is aimed at researchers in Computer Science and other disciplines like Mathematics, Biology, Neuroscience, etc., who share an interest in the analysis and control of complex networks by means of Data Mining approaches. The workshop is co-located with the IEEE International Conference on Data Mining (ICDM), the world's premier research conference in data mining (<http://icdm2019.bigke.org/>).

Important Dates

Workshop papers submission:	August 7, 2019
Notifications of paper acceptance:	September 4, 2019
CR copy submission and registration:	September 15, 2019
Conference/Workshop date:	November 8-11, 2019

Workshop Chairs

Assoc. Prof. Giuseppe Di Fatta
Department of Computer Science
University of Reading, UK
Email: G.DiFatta@reading.ac.uk

Prof. Antonio Liotta
Department of Electronics, Computing and Mathematics
University of Derby, UK
E-mail: A.Liotta@derby.ac.uk

Topics of Interest

Contributions are sought in all Data Mining algorithms and applications in Networks, including computer networks and any other complex interconnected system. Submissions on data mining applications of particular interest are also welcome.

Data Mining algorithms and frameworks:

- Parallel and Distributed Data Mining algorithms
- Graph and Subgraph Mining
- Data Mining in Communication Networks
- Analysis, modeling and visualization of complex and evolving networks
- Data Mining applications in Networks

Application domains:

- Computer Networks: Autonomous and Autonomic Networks, P2P, MANET, WSN
- Distributed Computing Systems: Cloud, Edge, IoT
- Social Networks, Citation Networks
- Scale-free and small-world networks
- Bioinformatics, Neuroinformatics

Submissions

Papers submitted to this workshop must not have been accepted for publication elsewhere or be under review for another workshop, conference or journal. Papers must be formatted to IEEE Computer Society proceedings manuscript style.

Workshop Proceedings and Journal Special Issue

Accepted papers will be included in the IEEE ICDM 2019 Workshops Proceedings volume published by IEEE Computer Society Press (also included in the IEEE Xplore Digital Library).
